

E-COMMERCE SALES PERFORMANCE DASHBOARD – SUMMARY REPORT

Overview

This dashboard was developed to analyze sales performance, customer behavior, and business trends using interactive visualizations and key performance indicators (KPIs). The dashboard enables stakeholders to monitor revenue, order volume, product performance, referral source effectiveness, payment preferences, and monthly sales trends.

Key Performance Indicators (KPIs)

- Total Revenue: \$1,264,762
- Total Orders: 1,200
- Average Order Value (AOV): \$1,054

Key Findings

Revenue Performance

The business generated a total revenue of \$1.26 million from 1,200 orders, demonstrating strong overall sales performance. The average order value of \$1,054 indicates that customers make relatively high-value purchases.

Product Performance

Chair generated the highest revenue (\$195,620), making it the best-performing product category. Printer followed closely behind, while Phone recorded the lowest revenue among all products analyzed.

Referral Source Performance

Instagram was the most effective referral source, generating \$275,285 in revenue. This suggests that social media marketing plays a significant role in customer acquisition and sales generation.

Order Status Analysis

Cancelled orders were the highest recorded order status, followed by returned orders. This trend highlights potential challenges in customer satisfaction, product fulfillment, or operational processes that may require further investigation.

Payment Method Analysis

Online payments were the most preferred payment method, indicating a strong customer preference for digital transactions. Gift Card payments were the least utilized payment option.

Revenue Trend Analysis

Monthly revenue fluctuated throughout the year, with June recording the highest revenue (\$170,616) and September recording the lowest revenue (\$69,322). These fluctuations suggest possible seasonal patterns in customer demand.

Recommendations

- Increase marketing investment in high-performing channels such as Instagram.
- Promote top-performing products, particularly Chairs and Printers, through targeted campaigns.
- Investigate the causes of order cancellations and returns to improve customer satisfaction and operational efficiency.
- Analyze the factors contributing to June's revenue peak and replicate successful strategies in lower-performing months.
- Continue enhancing digital payment options to align with customer preferences.

Conclusion

The dashboard provides valuable insights into business performance and customer behavior. Revenue generation remains strong, driven by high-performing products and effective marketing channels. However, reducing cancellations and returns while optimizing marketing strategies presents an opportunity for further growth. These insights can support data-driven decision-making and improve overall business performance.
